LEARNING ACTIVITY SHEET

Learning Area:	General Mathematics	Quarter:	1
Lesson No.:	1.1	Date:	
Lesson Title/ Topic:	Computing Salary, Wage, and Commission		
Name:		Grade & Section:	

Activity No. 1:

PRACTICING THE SKILLS ON COMPUTING SALARY, WAGE, AND COMMISSION

Objective(s):

In this activity you will reinforce your understanding on computing salary, wage, and commission

Materials Needed: pen and paper, and calculator

Instructions:

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer.

1. Monthly Wage from Annual Salary (Basic)

Liza is a public-school teacher in the Philippines earning an annual salary of ₱456,000. What is her monthly salary?

2. Paolo works as a barista in a local café and earns ₱85 per hour. He works 40 hours a week. What is his weekly wage?

3. Jessa is a salesclerk earning ₱100/hour for regular time and 1.5 times the rate for overtime. She worked 48 hours this week (40 regular, 8 overtime). What is her total weekly wage?

4. Marco works as a security guard for ₱110/hour. He works 10 night shifts a week and receives a ₱30/hour night differential allowance. He works 60 hours a week. What is his total weekly wage?

5. Irene sells insurance. She earns a ₱7,000 base monthly salary plus 3% commission on total sales. This month she sold ₱500,000 worth of policies. What is her total monthly earning?
6. Rico sews face masks for a local manufacturer. He is paid ₱12 per piece. In one week, he produced 400 masks. How much did Rico earn this week?
7. Erwin works at a car dealership. He gets ₱10,000 monthly salary, 2% commission on car sales, and overtime of ₱150/hour. This month, he sold ₱800,000 worth of cars and worked 10 overtime hours. What is Erwin's total monthly income?
8. Job Offer A: ₱18,000 monthly salary, with ₱1,500 in transportation and meal allowance
 Job Offer B: ₱20,000 monthly salary, but no allowances
 Which job offers more take-home value, and what should the person consider aside from the pay?
9. Mara earns ₱28,000 per month. Her monthly expenses are:
 Rent: ₱7,500
 Food: ₱5,000
 Utilities: ₱2,000
 Transportation: ₱3,000
 Other needs: ₱4,000
 She wants to save 15% of her income.
 Questions:
 a. How much is left after all expenses?
 b. Can she save 15% of her income?
 c. What advice can you give her to meet her saving goal?
10. Job A: ₱16,000/month + ₱2,000 monthly transportation and meal allowance
 Job B: ₱18,000/month, no allowance
 Questions
 a. Which job has the higher total compensation?
 b. What other factors should be considered before choosing?

Activity No. 2:**PROGRESS CHECKING ACTIVITY ON SALARY, WAGE, AND COMMISSION****Objective(s):**

In this activity, you will demonstrate your understanding of how to compute salary, wage, and commission based on real-life scenarios.

Materials Needed: pen and paper, and calculator

Instructions:

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer

1. Ella is a government clerk earning an annual salary of ₱360,000. What is her monthly salary?

2. Rico works as a dishwasher in a carinderia. He is paid ₱80 per hour and works 8 hours per day, 5 days a week. What is his weekly wage?

3. Nina is a fast-food crew member. She earns ₱95/hour for regular hours and ₱125/hour for overtime. This week, she worked 40 regular hours and 6 overtime hours. What is Nina's total weekly wage?

4. Benjie works as a delivery helper earning ₱400/day for 6 days/week. He also receives a ₱500 weekly food allowance. How much does Benjie earn in a week?

5. Jessa is a cellphone store salesperson. She gets a fixed monthly salary of ₱9,000 and a 5% commission on total sales. In one month, she sold ₱100,000 worth of phones. What is her total monthly income?

6. Carlo is a tailor who earns ₱20 per uniform sewn. He finished 180 uniforms this week. How much did Carlo earn?

7. Anna works as a cashier in a grocery store and is paid ₱570 per day. She works 6 days per week for 4 weeks a month. What is her total monthly wage?

8. Leo is a part-time appliance salesman. He receives a ₱7,000 base salary, a 4% commission on sales, and ₱120/hour for overtime. He sold ₱150,000 worth of appliances and worked 10 overtime hours. What is his total income?

9. Job Offer A pays ₱17,000/month with a ₱2,000 monthly transport allowance.
Job Offer B pays ₱19,000/month with no allowance.

- a. Which job offers the higher monthly compensation?
- b. What might be other factors to consider in choosing the job?

10. May earns ₱27,000 per month. She wants to start saving. Her expenses are:
Rent: ₱7,000 Food: ₱6,000 Transportation: ₱3,000 Utilities: ₱2,000 Miscellaneous: ₱5,000
Questions

- a. How much will she have left after expenses?
- b. If she wants to save ₱5,000 per month, can she do it?
- c. What are ways she can reduce spending to meet her savings goal?

V. Synthesis:

1. How will you differentiate salary, wage, and commission?

2. How will you compute salary, wage, and commission?
