LEARNING ACTIVITY SHEET

Learning Area:	General Mathematics	Quarter:	1
Lesson No.:	1.2	Date:	
Lesson Title/ Topic:	Computing Gross and Net Pay		
Name:		Grade & Section:	

Activity No. 1: PRACTICING THE SKILLS ON COMPUTING GROSS AND NET PAY

Objective(s):

In this activity you will reinforce your understanding on computing gross and net pay.

Materials Needed: pen and paper, calculator, spreadsheet

Instructions:

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer.

1. Mia is a factory worker earning ₱610 per day. She worked 20 days this month. Compute Mia's gross monthly income, estimate her SSS, PhilHealth, Pag-IBIG, and withholding tax, and determine her net pay.
2. Jacob earns ₱75/hour, worked 40 regular hours and 10 overtime hours (OT rate is 125%). Compute Jacob's gross income, apply government deductions using formulas, and find net income.
3. Carla is a government employee with a monthly salary of ₱38,150. She also pays a GSIS loan of ₱4,000/month. Compute all deductions (GSIS = 9% gov't rate used here), PhilHealth, Pag-IBIG, tax (approximate), and net pay.

4. Ariel earns a base salary of ₱10,000 and 10% commission from ₱80,000 sales. Compute gross income, estimate deductions, and get net income.

You are choosing between two job offers:

Job A: ₱25,000 salary + ₱3,000 allowance

Job B: ₱28,000 salary, no allowance

Calculate full deductions for each job and determine which gives higher net income.

5. You are choosing between two job offers:

Job A: ₱25,000 salary + ₱3,000 allowance

Job B: ₱28,000 salary, no allowance

Calculate full deductions for each job and determine which gives higher net income.

Activity No. 2: PROGRESS CHECKING ACTIVITY ON GROSS AND NET PAY

Objective(s):

In this activity, you will demonstrate your understanding of how to compute gross pay and net pay. You will apply your knowledge of income, deductions, and benefits by solving problems and showing complete solutions.

Materials Needed: pen and paper, calculator, spreadsheet

Instructions:

Analyze and solve each problem carefully. Show your complete solution or computation for each item to support your final answer.

Analyze solve each problem.

1. Ella works as a clerk with a daily wage of ₱570. This month, she worked only 15 days due to a family emergency. Compute her gross pay, deductions, and net pay.

2. Jayson is a technician earning ₱95/hour. He worked:

- 40 regular hours
- 5 overtime hours (paid at 125%)
- 8 holiday hours (paid at 200%)

Compute his gross income, deductions, and net pay

3. Grace has a monthly salary of ₱30,000. She also received a ₱5,000 performance bonus this month. Compute her gross income, government-mandated deductions, and net pay.

4. Nikki earns ₱20,000 base salary and receives 12% commission on ₱50,000 monthly sales. Compute total earnings, apply deductions, and determine net income

5. You are offered:

Job X: ₱22,000 monthly + ₱2,500 food allowance

Job Y: ₱25,000 monthly, no allowance

Calculate net pay of both offers and decide which is better.

V. Synthesis:

1. How will you differentiate gross pay and net pay?

2. How will you compute gross and net pay using spreadsheet.
